PROFESSIONAL SUMMARY

Computer Science Engineering student with a CGPA of 8.2, focused on software development and aspiring to become an AI Engineer. Hands-on experience in Java, Data Structures and Algorithms, MERN stack development, REST APIs, databases, and real-time systems. Currently working as an AI Web Developer Intern at InAmigos Foundation and learning Generative AI, RAG, Agentic AI, and Data Science. Founder and Technical Head of Pynerix, a student-led web development initiative.

EDUCATION

Degree / Certificate	Institute	CGPA / Percentage	Year
B.E. – Computer Science Engineering	Anna University	8.2 / 10	2024–2028
Higher Secondary	Vidhya Matric Hr. Secondary School	89%	2023–2024
Secondary	Vidhya Matric Hr. Secondary School	83.8%	2021–2022

EXPERIENCE

AI Web Developer Intern | InAmigos Foundation2026–Present

- Contributing to web development and AI-assisted development tasks while building responsive pages and improving existing website interfaces.
- Analyzing UI, layout, accessibility, content structure, and user experience; creating improvement proposals using screenshots and annotations.
- Implementing assigned web solutions and exploring AI-assisted development workflows to improve productivity and problem-solving.

PROJECTS

AeroTrack – Air Quality Monitoring DashboardJULY 2026

React.js, Node.js, Express.js, MySQL, Bootstrap 5, Chart.js

- Built a full-stack air-quality dashboard that simulates sensor readings every 5 seconds, classifies pollution levels, and stores readings in MySQL.
- Implemented REST APIs for readings, statistics, PM trends, search, filtering, manual entry, validation, and CRUD operations.
- Added Chart.js visualizations and validation for missing, impossible, extreme, and duplicate/stuck sensor readings.

ToonFlix – Full-Stack Cartoon Streaming PlatformMAY 2026

MongoDB, Express.js, React.js, Node.js, Socket.IO, JWT, Bootstrap

- Developed a MERN-based streaming platform with authenticated users and a responsive interface.
- Implemented real-time Watch Together synchronization and chat using Socket.IO/WebSockets, with JWT authentication and MongoDB persistence.

AgriQueue – Farmer IVR & Web Procurement SimulatorAUGUST 2026

Node.js, Express.js, MongoDB Atlas, HTML, CSS, JavaScript

- Designed a Tamil-first procurement workflow with simulated IVR, web, and WhatsApp-based interactions.
- Implemented authentication, 1-hour slot booking, queue/payment status, cancellation, rescheduling, and duplicate-interaction prevention.

TECHNICAL SKILLS

Programming: Java, JavaScript, Python (Basic), SQL | **Frontend:** HTML, CSS, Bootstrap 5, React.js | **Backend:** Node.js, Express.js, REST APIs
Databases: MongoDB, MySQL | **Core:** Data Structures & Algorithms, Object-Oriented Programming, CRUD Operations, Responsive Design
Tools: Git, GitHub, VS Code, Chart.js | **Cloud:** Microsoft Azure Fundamentals
Currently Learning: Generative AI, Retrieval-Augmented Generation (RAG), Agentic AI, NumPy, Pandas, Matplotlib

LEADERSHIP / POSITIONS OF RESPONSIBILITY

Founder & Technical Head | Pynerix – Student Web Development Initiative2026–Present

- Founded and lead a student web development initiative focused on building practical applications as a team; coordinate tasks across frontend, backend, database, and Git/GitHub.

ACHIEVEMENTS

- SIH 2026:** Worked as a Developer and built the IVR Simulator, the key system contributing to the project's Round 1 evaluation; the project was selected in the Top 25.
- SIH 2025:** Led the team during internal hackathon preparation; the Smart Attendance System project was selected.

CERTIFICATIONS

Diploma: Full Stack Developer – I Shine Info Tech | **HackerRank:** SQL (Basic), Java (Basic) | **Microsoft:** Azure Fundamentals | **Google Cloud Skill Badges:** API Gateway, Cloud Storage, Pub/Sub, Google Workspace Tools
